Competitive Advantages of the Company Group

- ✓ To date , the Company Group has created new value based on its strengths in product capabilities and system development capabilities . Going forward , the Company will further enhance these strengths , while establishing new capabilities in product creation and intellectual property strategy , thereby achieving greater competitive advantages and delivering new value.

- Stable provision of industry-leading spreads and swap points

New Domains

- Outstanding problem-solving capabilities backed by over 20 years of FX-focused expertise
- Exceptional development speed that enables rapid response to market changes
- Low-cost operations realized through group synergies

- Protect excess earning power through intellectual property
- Establish uniqueness and strengthen competitive advantage
- Maximize revenue opportunities

Selected as a Constituent of the JPX-NIKKEI Mid Small Cap Index for the **4th Consecutive Year**

JPX-NIKKEI Mid Small

2023-2026 Selection

- 1 Financial Highlights of H1 FY2027/3**
- 2 FY2027/3 Full-Year Earnings Forecasts**
- 3 FY2027/3 Strategic Initiatives**
- 4 Capital Policy and Shareholder Information**
- 5 Appendix**

Financial Highlights of H1 FY2027/3

H1 FY2027/3 Executive Summary

金融を、もっと面白く。

- ✓ Trading profit increased significantly, driven by substantial revenue opportunities arising from higher short-term interest rates on the Turkish lira amid geopolitical risks, including tensions in the Middle East, as well as sharp fluctuations in FX markets triggered by coordinated Japan-U.S. currency intervention and remarks by U.S. officials aimed at curbing further yen depreciation during Q2.
- ✓ Financial revenue from the investment of customer segregated trust funds also exceeded expectations, supported by interest rate hikes by the Bank of Japan (BOJ).
- ✓ Although total selling, general and administrative expenses (SG&A) increased YoY, mainly due to higher personnel expenses, real estate-related expenses, and taxes and dues, they remained within the planned range. With a predominantly fixed-cost structure, the significant increase in operating revenue translated directly into higher operating profit, boosting the operating profit margin.
- ✓ Growth in customer assets under custody was affected by realized losses resulting from the sharp appreciation of the yen in September. As a result, progress toward the full-year growth target of 16.8 billion yen reached only approximately 36% at the end of H1, falling short of expectations.

H1 Progress Against Initial Full-Year Earnings Forecasts

金融を、もっと面白く。

- ✓ At the end of H1, operating profit had reached approximately 92% of the initial full-year forecast, significantly exceeding expectations.
- ✓ In contrast, progress toward the full-year growth target for assets under custody remained at approximately 36%, highlighting the continued challenge of expanding the customer base despite strong progress in profitability.
- ✓ Revised the full-year consolidated earnings forecasts upward (see p. 20 for details).

Operating Revenue Trend

金融を、もっと面白く。

- ✓ While higher short-term interest rates on the Turkish lira supported swap income, sharp fluctuations in FX markets during Q2 created substantial revenue opportunities, **driving quarterly operating revenue to a new record high of 6.3 billion yen, approximately 1.5 times the previous record of 4.2 billion yen.**

(Millions of yen)

Quarterly Trend in Customer Open Positions

金融を、もっと面白く。

- ✓ The substantial customer open positions* built up over time contributed to increased revenue opportunities through heightened trading and position-closing activity during the market reversal.
- ✓ Despite significant market fluctuations, customer open positions at the end of Q2 remained above the level recorded at the end of Q1.

* "Customer open positions" refers to the volume of FX positions (long and short) opened by customers that remain outstanding and have not yet been closed.

Market Overview for Q2 FY2027/3

USD/JPY(Daily chart)

Market Overview

July: The yen continued to weaken until coordinated Japan-U.S. currency intervention in late July triggered a rapid unwinding of short yen positions and sharp yen appreciation. The yen subsequently weakened again, resulting in wider two-way market fluctuations.

August: Amid uncertainty over the sustainability of the yen's post-intervention appreciation, concerns over further intervention and Japan-U.S. monetary policy and interest rate outlooks weighed on the market. Persistent yen-selling demand driven by the Japan-U.S. interest rate differential kept the market volatile, with the yen fluctuating in both directions.

September: Significant shifts in Japan-U.S. monetary policy expectations, remarks by key officials, warnings against yen depreciation, and concerns over further intervention triggered intermittent position adjustments. Two-way market volatility increased throughout the month.

Summary: In Q2, FX intervention sharply reversed the prevailing yen depreciation trend. Shifting monetary policy and interest rate expectations in Japan and the U.S. then drove a transition from low volatility to wider two-way market fluctuations.

Monthly Average Daily USD/JPY Range over the Past Three Fiscal Years

- ✓ Coordinated Japan-U.S. currency intervention in late July triggered a sharp yen appreciation, followed by a rebound in USD/JPY, widening the trading range. In August and September, monetary policy expectations in Japan and the U.S., along with concerns over official warnings against yen depreciation and further intervention, contributed to a significant shift from the low-volatility environment seen through Q1.

Trends in Trading Volume in Japan's FX Market

金融を、もっと面白く。

- ✓ After remaining at low levels since April, trading volume across Japan's FX market reached its highest level of the year in September.

Domestic OTC FX Trading

Transition of SG&A Expenses

金融を、もっと面白く。

- ✓ Continued marketing initiatives to increase assets under custody, while trading-related expenses remained broadly in line with the same period of the previous year.
- ✓ Personnel expenses increased due to salary revisions, while real estate-related expenses rose following the expansion of office space in H2 of the previous fiscal year.
- ✓ Taxes and dues increased year on year, reflecting higher non-creditable consumption tax expenses resulting from an increase in financial revenue following the BOJ's interest rate hikes.
- ✓ Other expenses decreased as certain development-related costs previously recognized as expenses were capitalized.

* Includes a temporary increase of approximately 0.25 billion yen resulting from a change in accounting estimates.

Note: Totals may not equal the sum of individual items due to rounding.

Trends in Assets Under Custody

金融を、もっと面白く。

- ✓ Realized losses resulting from the sharp appreciation of the yen in September kept the increase in assets under custody during Q2 nearly flat. With growth slowing following the sharp fluctuations in FX markets, restoring growth momentum in H2 remains a key challenge.

(Supplementary Information) Effective Margin* Trend

金融を、もっと面白く。

- ✓ Customers' unrealized gains declined from 15.3 billion yen at the end of Q1 to 4.9 billion yen at the end of Q2, **a decrease of 10.4 billion yen.**

Sharp market movements triggered by currency intervention and other factors significantly affected the profitability of customer open positions accumulated during the yen's depreciation.

* Effective margin is the amount of assets under custody adjusted by unrealized gains and losses (valuation gains and losses on open positions).

Comparison of Other Companies in the FX Industry in Terms of Assets Under Custody

金融を、もっと面白く。

- ✓ Realized losses resulting from the sharp appreciation of the yen in September affected FX brokers across the industry. However, recent large-scale inflows of funds into Turkish lira positions, driven by heightened investor interest, boosted assets under custody at some brokers.
- ✓ Efforts will focus on regaining momentum in H2 toward the full-year target of 150 billion yen in assets under custody.

*Assets under custody of Gaitame.com Co., Ltd. include assets transferred in connection with the service integration with Money Partners Co., Ltd. on June 28, 2025.

Schedule of Changes in Assets Under Custody

(Billions of yen) (Apr 2026 – Sep 2026)

Source: Each company's website and publicly announced materials Only firms that specialize in FX and disclose their own monthly assets under custody are listed.

Consolidated Net Assets, Consolidated Own Funds and Financial Security

- ✓ Consolidated net assets and the Group's own funds increased as a result of profits recorded in H1, further strengthening financial soundness.
- ✓ Prudent capital management remains essential to prevent lost revenue opportunities due to trading restrictions by securing sufficient capital to cover increases in calculated risk amounts and maintaining an adequate capital buffer based on stress testing*.
- ✓ Prioritize retained earnings to maintain sufficient non-fixed capital, positioning it as funds available for reinvestment in the FX business.

(Billions of yen)

** Consolidated own funds = Consolidated Cash and Deposits + Short-term Deposits - Interest-bearing Debt [Short-term funds attributable to the Group, excluding cash segregated as deposits for customers]

金融を、もっと面白く。

FY2027/3 Full-Year Earnings Forecasts

FY2027/3 Earnings Forecasts (Upward Revision)

金融を、もっと面白く。

- ✓ The earnings forecasts take into account the possibility of continued low market volatility and a decline in short-term interest rates on the Turkish lira.
- ✓ From a statistical revenue forecasting perspective, the annual revenue yield is assumed to revert to its historical average, resulting in a more conservative revenue forecast for H2 compared with actual results for H1.
- ✓ Full-year SG&A expenses are expected to remain broadly in line with the initial forecast. Higher operating revenue is expected to drive profit growth, resulting in upward revisions of 2,000 million yen each to the full-year forecasts for operating revenue and operating profit.

(Millions of yen)	FY2026/3 (Actual)	FY2027/3 (Initial Forecast)	FY2027/3 (Revised Forecast)	vs. Initial Forecast	
				Change (Amount)	Change (%)
Operating revenue	13,218	15,700	17,700	+2,000	+12.7%
Operating profit (Operating Profit Margin)	6,161 (46.6%)	7,000 (44.6%)	9,000 (50.8%)	+2,000	+28.6%
Ordinary profit	6,161	7,000	9,000	+2,000	+28.6%
Profit attributable to owners of parent	4,244	4,800	6,100	+1,300	+27.1%

2 new patents obtained for proprietary technologies implemented in
New Minna-no Repeat

金融を、もっと面白く。

2 patents New Minna-no Repeat

Patent ① Variable-Rate Repeat (tentative name)

Repeats automated trading at order intervals suited to the price level

Even at the same 0.5% rate, the order interval changes with the price level

Around ¥200

¥199
~¥1
¥198
~¥1
¥197

Around ¥100

¥99.5
~¥0.5
¥99
~¥0.5
¥98.5

Schematic: 0.5% rate, no slippage (intervals approximate)

● New buy

With a fixed interval, order spacing stays constant. Variable-Rate Repeat (tentative name):
sets the next order interval as a fixed percentage of the price, maintaining steady trading even after the price range shifts

Patent ② Step Slide (tentative name)

Curbs the build-up of positions during sudden market moves

Conventional repeat orders

● Executed (position) ○ Not executed due to the limit

During sudden market moves, such as when slippage or price gaps occur, the number of new order executions is limited, avoiding a rapid build-up of positions (open positions) in a short time.
Helps reduce sharp short-term increases in unrealized losses

Step Slide (tentative name)

Schematic

Schematic: new executions limited during a sudden move

Patent ① + Patent ②

Combined effect of the
two technologies

By curbing new executions during sudden moves to prevent a surge in positions, and continuing to place orders at intervals based on a fixed rate after the move, we aim to limit the growth of unrealized losses while maintaining trading opportunities.

Initiatives to Attract Customers and Boost Trading Activity

金融を、もっと面白く。

» Q2: Enhanced Trading Terms, Customer Rewards, and Promotional Campaigns Continued Initiatives to Grow Assets Under Custody in H2

- ✓ **50 Million Yen Prize-Sharing Campaign:** Offered rewards for both deposits and new trades.

Bonus Swap Campaign: Expanded investment options and customer rewards for high-interest-rate currencies.

Up to 3 Million Yen Cashback Campaign: Continued in H2, offering cashback across all currency pairs based on net deposits and new trading volume to encourage growth in assets under custody and trading activity, alongside other attractive promotional campaigns.

- ✓ **Enhanced targeted rewards to boost trading activity and customer retention.**

The image displays three promotional banners for Traders, each featuring the 'みんなのFX + LIGHTFX' logo in the top left corner.

- Top Banner (Sunflower Theme):** Promotes a 'ご入金・お取引に応じて' (According to deposits and trading) campaign with a total prize of '総額 5,000万円' (Total 50,000,000 Yen). The campaign is titled '山分けキャンペーン' (Mountain Share Campaign) and runs from August 3 to September 30, 2026, commemorating the 3rd anniversary of the Hungarian Forint/JPY currency pair.
- Middle Banner (Cityscape Theme):** Promotes a 'スワップ上乘せ' (Swap Increase) campaign. It offers a maximum of '50日分' (50 days) of swap increase. A table shows that for 3 days of swap, the multiplier is 8x, and for 5 days, it is 10x. The campaign runs from August 3 to September 30, 2026, and is for new entries only.
- Bottom Banner (Autumn Leaves Theme):** Promotes a 'ご入金で還元額アップ!' (Increase cashback with deposits!) campaign. It offers a maximum cashback of '最大 300万円' (Maximum 3,000,000 Yen). The campaign is titled 'キャッシュバックキャンペーン' (Cashback Campaign) and runs from October 1 to November 30, 2026.

Strengthening Media Strategy

Basic Cybersecurity Policy

金融を、もっと面白く。

- » The recent series of cybersecurity incidents is being taken seriously as a potential threat to business operations, prompting heightened vigilance and stronger countermeasures, with cybersecurity positioned as a key management priority.

Basic Understanding

- ✓ Information leaks and service disruptions pose serious risks to trust and business continuity.
- ✓ Protecting customer assets and personal information and maintaining a secure trading environment are essential responsibilities.

Current Initiatives

- ✓ Continuously analyze cybersecurity incidents at other companies and thoroughly review systems and operational processes, down to the smallest details, assuming similar incidents could occur in our own operations.
- ✓ Promptly and appropriately address security-related requirements and updates issued by the Financial Futures Association of Japan (FFAJ).
- ✓ Introduced passkey authentication for “Minna-no FX” in March 2026.
Applied not only at login but also to critical operations, including withdrawal requests.
- ✓ Additional security measures include login alerts and Brand Indicators for Message Identification (BIMI) to help prevent email impersonation.

Future Policy

- ✓ Continuously strengthen cybersecurity through ongoing reviews and updates, allocating the necessary management resources and constantly striving for robust protection against evolving threats.

Selected in an index component as a company with high investment attractiveness

Selected as a component of the "JPX-NIKKEI Mid Small Cap Index" for **the 4th consecutive year.**

Only two companies* listed on the TSE Standard Market, including the Group, have been selected for the 4th consecutive year.

JPX-NIKKEI Mid Small

2023-2026 Selection

Selected for the "JPX-NIKKEI Mid Small Cap Index" for **the 4th year** in a row, which includes companies with high investment attractiveness for investors, such as those with efficient use of capital and a management perspective with investors in mind.

Re: JPX-NIKKEI Mid Small

- ✓ A stock price index calculated jointly by JPX Research Institute and Nikkei Inc. that applies the same concept as the JPX Nikkei 400 to small- and mid-cap stocks and is composed of companies that **are engaged in sustainable corporate value enhancement and shareholder-oriented management.**
- ✓ **A total of 200 stocks are selected** from companies listed on the Tokyo Stock Exchange's Prime, Standard, and Growth Markets based on criteria combining quantitative scoring and qualitative factors.

Sustainability Policy

Traders Group's Perspective on Sustainability

Up to now, we have been gradually growing as a company by appropriately collaborating with or receiving support from various stakeholders, including shareholders, investors, customers, suppliers, employees, and related organizations.

As a publicly listed company and a corporate entity engaged in a variety of businesses, the Group will continue to pursue not only its own interests but also materiality in its financial instruments business and system development consulting business, both of which can contribute to society and the environment in the long term. We will continue to pursue materiality initiatives that can contribute to society and the environment over the long term in our financial instruments business and system development consulting business.

We believe that it is our duty, responsibility, and mission to promote initiatives to enhance or create social and economic value in collaboration with our stakeholders to drive the growth of our group in the future, and to address issues surrounding sustainability in terms of society and the environment.

Addressing Social Challenges

Financial Literacy Initiatives

Hosted Eight High School Students for the Fourth Consecutive Year of Job Shadowing
Students from Seiko Gakuin, Senzoku Gakuen, and Shonan Shirayuri Gakuen Participated

The program was held in August 2026 as part of a job-shadowing initiative for high school students organized by NPO JUKE, welcoming eight students from three schools. Through observing FX dealing operations and interacting with employees, the students gained insights into careers in the financial industry, the importance of teamwork, and their future career paths.

The program also provided an opportunity for students to gain firsthand experience of the workplace and its operations, making the financial industry feel more accessible and familiar.

Participants shared positive feedback, such as “The program changed my perception of the financial industry” and “I learned practical insights that are difficult to gain at school.” The program also received high satisfaction ratings in the post-event survey.

Through firsthand exposure to actual work and interactions with employees, the program helped students deepen their understanding of finance and provided an opportunity to reflect on their future careers and working lives.

Addressing Social Challenges

Financial Literacy Initiatives

Held lectures on finance, economics, and fraud prevention, including AI-powered scams, at Shibuya Hachiko University
Leveraged expertise in finance and IT to enhance financial and digital literacy among seniors

In August 2026, an introductory financial literacy course was held as an independently organized class within Shibuya Hachikou University, a program hosted by Shibuya City for residents aged 55 and over.

The course covered a wide range of financial topics to help participants protect their finances and prepare for the future, including prevention of financial fraud such as impersonation scams and social media-based investment scams, as well as yen depreciation, inflation, pensions, interest rates, compound interest, and long-term, regular and diversified investing. Through hands-on exercises, participants deepened their understanding of how market conditions affect asset values and the importance of diversification.

Participants shared positive feedback, including “The real-life examples of financial fraud were helpful” and “It was a good opportunity to think about balancing my investments.”

FleGrowth Co., Ltd., in collaboration with Shibuya Police Station, held a seminar on preventing fraud, including AI-powered scams, under the theme “Protecting Yourself from Increasingly Sophisticated AI Scams,” attended by 28 participants.

The seminar covered the latest fraud tactics and featured demonstrations of AI voice cloning and conversational AI to illustrate how advances in AI are changing fraud methods. Practical prevention measures were also introduced, such as hanging up on suspicious calls and calling back using official phone numbers or verifying information through alternative communication channels.

Survey results showed 96% positive ratings for understanding and usefulness, and 92% for satisfaction and willingness to recommend. Participants commented, “I was surprised by how natural the conversation with generative AI felt and how far the technology has advanced.”

Addressing Social Challenges

Financial Literacy Initiatives

Delivered the third special lecture on financial and economic education at Gakushuin University in October 2026

Encouraged approx. 100 students to think proactively about their futures by connecting finance with career development

On October 6, 2026, a special lecture on financial literacy was delivered to approximately 100 students in the "Career Design I" course taught by Special Visiting Professor Kamihito Takeuchi at Gakushuin University. This marked the third lecture in the course, following sessions in December 2025 and April 2026. Yoshio Iguchi, Director of TRADERS SECURITIES CO., LTD., served as the guest lecturer. Under the theme "Managing Money in the Era of 100-Year Lifespans," he covered the fundamentals of asset building, including long-term, regular and diversified investing, risk and return, and precautions against investment scams. He also highlighted principles shared by investing and career development, such as long-term thinking, decision-making under uncertainty, and continuous learning through experience. In the second half of the class, students participated in group exercises to evaluate currencies for investment by comparing political and economic conditions, interest rates, and inflation across countries. Through discussions and presentations, they learned the importance of making decisions based on multiple sources of information and gained firsthand experience in evaluating the rationale behind their decisions.

Post-lecture survey results showed 97% positive ratings for both overall satisfaction and clarity of the lecturer's explanations. Students commented, "I learned what information to focus on when making investment decisions" and "I realized the importance of learning about asset building to prepare for my future." Financial literacy is viewed not only as knowledge for asset building but also as an essential skill for understanding society and the economy and making informed decisions about one's future. Going forward, efforts will continue in collaboration with educational institutions and local governments to improve financial literacy and help individuals develop the ability to think independently, make decisions, and take action.
